Fine Decorative Finishes

New Creations Fine Decorative Finishes can take your space far beyond the realms of flat paint. Our new showroom is NOW OPEN and is a perfect display of how faux finishing and decorative painting can add dimension and texture, drama, warmth and creativity to an environment.

New Creations can turn your dream of how you want your home to look into reality. A master bath or guest powder room is a perfect place to start. Personalize your space in the master bath, with not only color-but with texture and ambiance that only a hand painted finish provides.

Whether you want to bring the ultimate "spa" feeling to your space with cool water colors and pearlized influences, or maybe the warm colors of the setting sun are what relax you. Decorative painting can create the feeling of being on the beach at sunset! The powder room is a great way to show your guests your exquisite taste. It's the room most seen by guests only, and can truly be a beautiful artistic expression, starting with your ideas or experiences. We provide our clients with a personalized alternative to the ordinary. Each person is very unique and their home should compliment them. It is our passion to create a finish that reflects their personality, making their space enjoyable to live in. We approach each new project with enthusiasm and thankfulness for another opportunity not only to do what we love, but to enable yet another client with the means to create the home of their dreams. Call today-or better yet, come by and see our new showroom. We would love to work with you on your next project. ■
